

Discover a more sustainable way to live.

Welcome to a lifestyle more connected to nature and the environment

It's a beautiful environment at Apsley, and our designers have prioritised the ongoing liveability and sustainability of the estate.

We know how important it is to feel closer to nature. We've gone to great lengths to enhance this. The layout of the estate makes the most out of natural features like existing pockets of mature trees and bush, the shape of the land, and the open spaces.

To this, we're adding landscaping with more trees, creating a network of paths and parks to promote walking and riding, and encouraging the use of solar power through our solar packages included with every purchase. Apsley is a place where you can be more connected to the environment and each other - where you can grow forever, together. Here's how we're helping you do this.

Apsley

BY QUBE

Retaining natural bush

On the north side of the estate lies Mokare Reserve, the perfect example of how we're preserving areas of bush with significant trees and natural clearings which abutt areas of our walkability network. So you can explore, play and discover something new every day.

Planting more trees

We've undertaken a major landscaping program that will see us planting larger trees at the entrance and along the main boulevards (in some cases on both the edges and central median strips). Added to this will be a tree on the front lawn of every property. This will help keep the estate cooler in summer, and create a beautiful neighbourhood of tree-lined streets with a stunning mix of species, including Plane Trees, Liquid Ambers, Ornamental Pears, Peppermints, Paper Barks, and various eucalypts.

Paths and Fitness

We want you to get out and about to enjoy the great outdoors. It's good for your body and mind, and our environment. Dual use paths create green links and walkability to the community's future amenities like the school, shops, café, community centre and open spaces as well as joining up to Rowley Road and the Freeway cycle path. Walking paths and trails, and cycling routes create less reliance on cars and reduces greenhouse emissions. Add to this the half basketball court, public exercise equipment and the future oval, and you'll soon discover that life in Apsley feels really good.

Building the community spirit

Getting out and getting to know your neighbours is a major way we're using good design principles to build the feeling of belonging to a real community. On top of this we've planned for a Community Centre and retail area with a supermarket, café and more. Our first residents will also become members of the exclusive 'Pioneer Club' with a limited-edition Welcome Pack and other local benefits.

Apsley Everything

As part of our aim to create a more beautiful and environmentally friendly neighbourhood, we've created a package for new homeowners that gives you front garden landscaping including 12-months free maintenance, plus lot boundary fencing. And, just to ensure we keep our carbon footprints down, we'll also provide a 3kW solar system for every home.

With these features, initiatives and designs in place, we can help create a beautiful environment for you to live. The rest is up to you. Enjoy the adventure of creating new beginnings and starting this great new chapter in your life.
